Justification criteria

A) No variety of the species which the user wants to obtain is registered in the organic seed database.

B) The seed supplier is unable to deliver the seed before sowing or planting despite the user ordering in reasonable time.

C) No variety which the user wants to obtain is registered in the database, and the user can demonstrate that none of the registered alternatives of the same species are appropriate for production.

D) For research purposes, to test in small-scale field trials or for variety conservation purposes agreed by the competent authority of the member state.
