Reason for derogation request

a	No variety of the species which I want to use are registered in the Irish organic seed database
b	The seed supplier is unable to deliver the seed or seed potatoes before sowing or planting despite ordering the seed or seed potatoes in reasonable time.
c	The variety which I want to use is not registered in the database and I can demonstrate that none of the registered alternatives of the same species are appropriate for my production (you will need to indicate the reason they are not appropriate)
d	For research purposes

* working note: category E has been used where "the seed is part of a grass or forage mix containing at least 70% organic seeds". This distinction is made in the UK seed derogations records and may be considered useful. All derogations marked here as E would otherwise fall into category A.
